## Consulting

---

We work on a systemic basis. During the consulting process we attach great importance to the involvement of all people concerned. You are the expert when it comes to your markets, products, and customers. We are the experts in project management. Our spectrum ranges from short analyses and recommendations, to the company-wide introduction and optimisation of project management approaches.

In joint cooperation, we devise outstanding solutions that can be immediately applied and will stand the test of time.

## Training

---

We offer the whole portfolio of Project Management trainings applying a combination of sound project know-how and the necessary soft skills such as leadership, conflict management or leading negotiations. We customize our offers and solutions to your requirements. Our trainings are directed to all levels of your company: from project team members to project managers as well as the top management. In our trainings, project managers acquire abilities to handle even difficult project situations. We build upon our participants' experiences and strengthen their self-responsibility for future successful projects.

We use to tailor our courses to your respective needs and environment.

## Certification

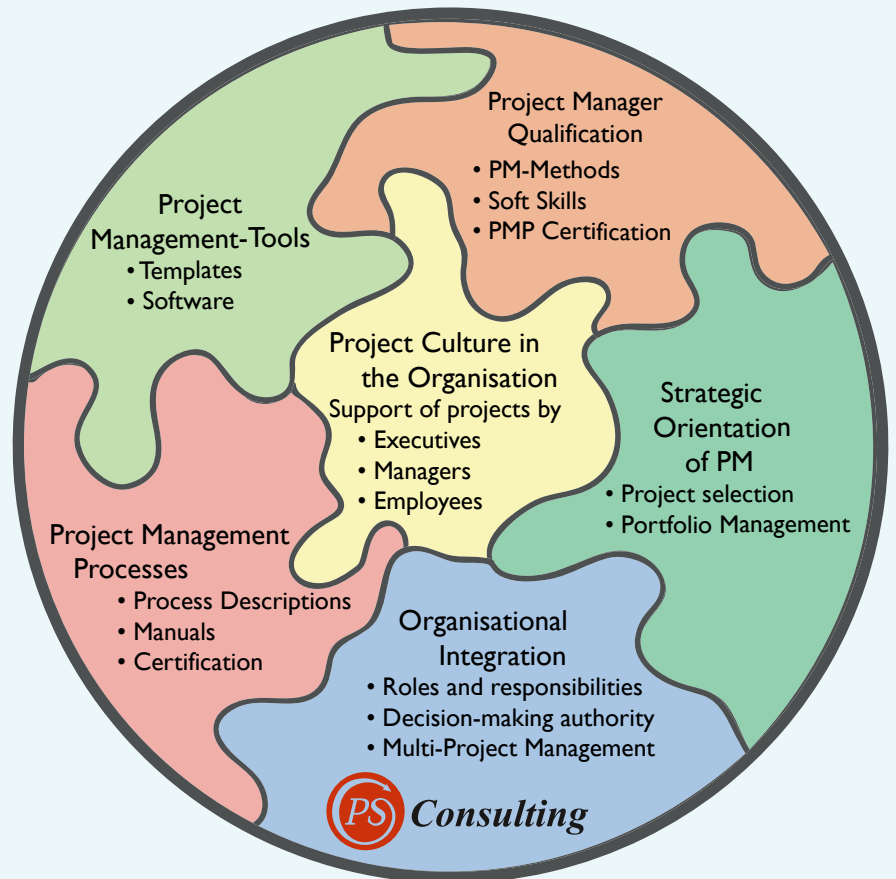

---

Our range of offers also includes a certification for project managers according to international standards. We can present such a qualification as a Registered Education Provider (R.E.P.) of the Project Management Institute (PMI). As the leading global professional association in the field, the PMI sets standards in project management. We educate and support you in becoming a certified Project Management Professional (PMP).

By attaining the PMP credential, project managers will be included in the largest and most prestigious group of professionals in the project management community.

**We use to work professionally with a hands-on approach, always oriented to your concrete needs.**

**Our consulting approach includes all essential areas of successful project management**

## Our Approach

We do not provide patented recipes which we “force” upon your company. Instead we work with you to generate ideas and methods that are perfectly suited to your company and your field.

Based on an initial analysis, we advise you holistically and comprehensively on the optimisation and improvement of project management in your organisation.

Depending on your original position, this could be:

- Developing an efficient Project Organisation
- Optimise PM Processes in your company
- Introduce a PM Office for the integration of your projects
- Developing a meaningful Project Controlling
- Develop your Qualification Concept for your team
- Developing a PM Handbook
- Introducing an overall Programme and Portfolio Management
- Introduction / Optimisation of a suitable PM-Software
- Coaching of Project Leaders

## Consulting in Detail

## Our Seminar Curriculum

Our comprehensive curriculum contains project management trainings for all experience levels, among them the Project Management Professional certification according to the standards of the Project Management Institute (PMI). The clear structuring and logical configuration of our programme enables you to develop your professional skills in a consistent and tailored manner, depending on your individual state of knowledge.

This way, you can choose single seminars for your needs. But our programme enables you to plan a continuous education as well.

### **PM Practitioner Level**

This level is suitable for project leaders of smaller projects, prospective project leaders and project team members who are to take on larger roles within projects. You will get trained to use essential tools for planning, executing and closing projects successfully.

### **PM Master Level**

Project managers who are already proficient in the basic methods of project management will further develop their professional qualification as a project management expert. This places you in a position to take over and lead larger and more complex projects.

### **PM Expert Level**

This level has been specially developed for those project leaders who already possess highly extensive experience in project management and who now wish to round off and further deepen this knowledge.

### **Project Manager Certification**

Our modular course series „PMP Preparation Course“ prepares you in the best way for the Project Management Professional (PMP) credential granted by the Project Management Institute (PMI). The training is suitable for experienced project managers who fulfil the exam prerequisites set by PMI and wish for a widely recognized proof of their competences in project management.

### **Project Management for Executives and Managers**

This seminar is addressed to managing directors, executives and managers who assign projects or are deeply involved in decision processes. You will learn how you can set up and form the project environment in a way to be able to run projects efficiently.

### **Inhouse-Seminars - Tailored to your needs**

We naturally offer all of the seminars on this website in the form of company-specific in-house seminars. We always configure our seminars on the basis of your needs and are happy to adjust our palette to suit you. In doing so we are able to develop individual seminars, complete training curricula and combinations. Thus, we create a solution which is of ultimate benefit to your company.

## Our Team

A team is a living organism and not an abstract construct. For us, the involved individuals and their know-how stands at the forefront of our work. This is why our team is comprised of skilled experts who are able to bring their knowledge and experience with them and pass this on to the personnel in your company.

All of our trainers and consultants have years of experience as active project managers and have been working for years training and consulting in smaller and larger companies worldwide. Our languages are German, English, French, Spanish and Italian.

The PS Consulting core team consists of 13 trainers and consultants. To be able to offer you an optimal solution, we work together in tight cooperation with a network of 25 colleagues, which we can involve if necessary.
